

What is the ideal choice of registration for a non-profit in India?

The question relates to the benefits of registering in Maharashtra vs elsewhere in the country. The process is stringent in Maharashtra and is looked upon favourably by certain sections, like grant makers.

It is alright to register in Delhi but let us say you are going to go the Maharashtra state government for grants. They will question why you choose to register outside Maharashtra when you are doing bulk of the work in Maharashtra. You cannot say due to ease of procedure. They will view this in an unfavourable manner. So decide place of registration carefully. You cannot decide at a workshop.
